

Neotys Partners With The Ian Thomas Group, LLC to Provide Affordable Stress and Load Testing of Web Applications

The Ian Thomas Group, LLC to Offer Testing Services Based on Neotys' NeoLoad

Merrimack, NH – February 1, 2010 – [Neotys](#), a leader in easy-to-use, cost effective load testing tools for web applications today announced that The [Ian Thomas Group](#), LLC (ITg) has become a partner of Neotys' partner program and will use Neotys' NeoLoad to provide outsourced load and stress testing solutions for its customers.

Neotys certified partners are experts in the field of web application quality and performance, have successfully passed the NeoLoad certification exam and are available to guide customers through performance testing projects. ITg's load testing services are specifically designed for web applications. The results from the tests will isolate bottlenecks within a deployment and allow an opportunity to tune the environment to support the target capacity and maximum number of users.

According to Amit Patel, vice president of testing services, ITg, "With Neotys, our expert consultants can pin-point system performance issues before they become big production problems. We can provide in depth analysis and actionable items and then work to resolve issues which affect performance. Neotys allows us to pre-assess the scalability of the application before deployment and production."

According to Stephane Jammet, vice president of sales and business development, Neotys, "The people at ITg are experts in software performance engineering and the company's strength is its ability to get involved at any point in its customers' application development life cycles. We are pleased that ITg has standardized on NeoLoad to execute all stress and load tests required to understand web application performance."

NeoLoad is a web stress testing software solution that runs high-load scenarios on web applications to measure performance and robustness prior to deployment. Unlike other web testing tools that require scripting, are overly complex and expensive, NeoLoad is easy-to-use, thanks to an intuitive GUI interface, requires no scripting, and provides a rich feature set at a cost

effective price point. NeoLoad supports all web technologies and application server technologies including J2EE, .NET, PHP, AJAX, SOAP, FLASH, FLEX, GWT and Oracle Forms.
