

Neotys Partners with Mentora to Provide Stress Testing of Large Scale Internet Oracle E-Business, Enterprise Healthcare, eCommerce Applications

Neotys' NeoLoad to Provide Performance Tests Necessary Before Applications Go Live

Merrimack, NH – September 13, 2010 – [Neotys](#), a leader in easy-to-use, cost effective load testing tools for web applications, announced today that [Mentora Group](#), a provider of testing, tuning, and hosting services for business-critical systems, has become a Neotys Partner and is using Neotys' NeoLoad for performance testing of its customers' applications.

Mentora provides a broad range of application hosting and performance testing services to deliver uptime and performance for business-critical applications. The company specializes in performance testing and tuning of Oracle E-Business, Facets healthcare administration suite, and enterprise applications deployed with Citrix and WebSphere MQ technologies.

NeoLoad will be a core component of Mentora's performance testing and tuning service, used in pre-production performance testing of customers' applications. Mentora has already successfully used NeoLoad to test a major web application for a global 1000 manufacturing customer.

According to Dan Downing, vice president of testing services at Mentora, "Pre-production performance testing is vital to preempt application problems and avoid downtime in business-critical applications. With NeoLoad, we are getting through the testing faster and more cost effectively than before. NeoLoad adds value to our performance testing by providing robust and scalable load testing with excellent ease-of-use."

According Stephen Jammet, vice president of sales and business development, Neotys, "The pre-production environment and quality testing plays a pivotal role in defining a company's success with an application. Companies today cannot afford to encounter performance or stability problems with their business critical applications. Mentora is addressing this issue with its high

quality testing and tuning service that is now powered by NeoLoad to test its customers' web applications. Mentora has the load test expertise to meet the service demands of our growing user base.”

NeoLoad is a web stress testing software solution that runs high-load scenarios on web applications to measure performance and robustness prior to deployment. With an intuitive GUI interface NeoLoad is easy-to-use, which eliminates scripting, and provides a rich feature set at a cost effective price point. NeoLoad supports all web technologies and application server technologies including J2EE, .NET, PHP, AJAX, SOAP, FLASH, FLEX, GWT and Oracle Forms.

About Neotys www.neotys.com

Since 2005, Neotys has been helping its clients in more than 60 countries to ensure their applications' reliability, performance and quality. NeoLoad, load testing solution, ensures better efficiency enabling users to perform tests faster, while providing pertinent analyses and full support for all new technologies. At each stage of a project, Neotys consultants are on hand to guide users, thereby ensuring the successful deployment of applications.
