

## **Neotys Partners with Rolta TUSC to Provide Stress Testing of Large Scale Internet Applications**

### ***Neotys' NeoLoad to Provide Performance Tests Necessary Before Oracle and other Web Applications Go Live***

**NEW YORK– September 20, 2010** – [Neotys](#), a leader in easy-to-use, cost effective load testing tools for web applications, announced today that [Rolta TUSC](#) is using Neotys' NeoLoad for stress, performance and quality testing of its large scale IT applications.

Rolta TUSC, a Certified Oracle Advantage Partner in both technology and applications, is a wholly owned subsidiary in the Rolta India Limited group. It addresses the enterprise-wide end-to-end needs of organizations with its comprehensive range of solutions and services. This includes large-scale ERP applications, sophisticated database requirements, business intelligence and Agile SOA implementation, enterprise applications, business process management, enterprise performance management and governance. Rolta TUSC has recently become a Neotys Certified Partner.

The ever increasing complexity of enterprise wide software solutions introduces great risk to the success of these implementations. Together, Rolta TUSC and Neotys are addressing this issue. By using NeoLoad as a core component to its application development approach, Rolta TUSC delivers systems capable of living up to expectations of high availability, fast response and large user groups.

“Our goal is to incorporate high performance scalable load testing before we deploy our customers' business critical web applications,” said Donald Davis, EVP enterprise performance management, Rolta TUSC. “This partnership allows us to robustly test the performance, stability and scalability of our system deployments. Our customers benefit enormously by knowing that their system will stand up to the rigors of high usage volumes.”

According to Stephane Jammet, vice president of sales and business development, Neotys, “The ever increasing complexity of enterprise wide software solutions introduces great risk to the

success of these implementations. Companies today cannot afford to encounter performance or stability problems with their business critical applications. Together, Rolta TUSC and Neotys are addressing this issue. We are honored that Rolta TUSC has selected NeoLoad to be its new standard load tester for its web applications. The partnership validates the quality and capabilities of NeoLoad and increases our engagement with enterprise accounts.”

### **About Rolta**

Rolta is an Indian multinational organization that has executed projects in over 40 countries. Rolta serves these markets by providing innovative solutions in Enterprise Geospatial Information Solutions (EGIS), Defense & Homeland Security; Enterprise Design & Operations Solutions (EDOS); and Enterprise Information Technology Solutions (EITS). Rolta, through its joint venture with the Shaw Group Inc. USA – Shaw Rolta Ltd. – provides comprehensive Engineering, Procurement and Construction Management (EPCM) services to meet turnkey project requirements of power, oil, gas and petrochemical sectors.

### **About Neotys [www.neotys.com](http://www.neotys.com)**

Since 2005, Neotys has been helping its clients in more than 50 countries to ensure their applications' reliability, performance, and quality. NeoLoad, load-testing solution, ensures better efficiency enabling users to perform tests faster, while providing pertinent analyses and full support for all new technologies. At each stage of a project, Neotys consultants are on hand to guide users, thereby ensuring the successful deployment of applications.
