

Neotys

Make sure it works

Does your web application scale under load?
Do the response times meet your target requirements?
Is the current choice of architecture the right one?

Test your web application's performance easily
using NeoLoad and deploy with confidence!

Neotys

"Make sure it works": Since 2005, Neotys has been helping its clients in more than 60 countries to ensure their applications' reliability, performance and quality.

NeoLoad, load testing solution, ensures better efficiency to perform your tests faster, while providing pertinent analyses and full support for all new technologies.

At each stage of your project, the Neotys consultants are on hand to guide you, thereby ensuring the successful deployment of your applications.

« The tool is powerful and easy to use. The main benefits while using NeoLoad were bug fixing, long term checks, server scaling. »

Dietmar Behrens
Project Manager e-commerce
Siemens (Germany)

Why load testing is critical

Load Testing allows you to predict performance, identify web application issues in a simulated environment and to eliminate problems before they occur in real situations. By stress testing a web application, you can make sure that it will be 100% reliable before it goes into production. Most performance problems are commonly caused by:

« We knew we had the right product when they didn't have to send a consultant with the trial download to explain the software. We were getting relevant results within 30 minutes of installing the software. »

Josh Schlessler - VP Technology
The Active Network (USA)

- flawed software configuration
- inefficient network configuration
- poorly designed code (i.e concurrent access issues)
- inadequate hardware resources

Poor performance and interruption of service impact your investment in number of ways: loss of potential customers or partners, decrease in productivity, brand erosion, costly repairs, unnecessary hardware investment.

Load testing ensures that your application will meet your requirements once in production. Anticipate with NeoLoad and you will significantly improve the reliability of your application while reducing your maintenance costs!

NeoLoad software

Web load testing made easy

Test more quickly:

- Automatic handling of all your application's dynamic parameters without the use of scripts.
- Intuitive analysis of your servers' resources, thanks to the pre-configured monitors.
- Automatically generated reports that identify the critical points and hotspots.

Test more efficiently:

- Add custom rules to correlate dynamic parameters and handle application's framework.
- Debug mode to fine-tune your virtual users in more complex cases.
- Real-time monitoring of test runs (requests/responses for each V.U.).
- JavaScript Add-on's for further customizing scenarios.

« The reporting facilities are excellent, enabling us to produce professional-looking documents for our customer with minimum effort. »

Philip Turtle, Architect 3D-VE
Unisys (UK)

Test all your Web applications:

- Server technologies: PHP, J2EE, SOAP, .NET, ASP.
- RIA technologies: Ajax, Flex, Flash, Air, GWT, Silverlight.
- ERP technologies: Sap Web, Oracle Forms...

A global success

With a growing customer base in the United States, and over 700 customers in more than 60 countries, NeoLoad is fast becoming the industry's web load testing tool of choice. Renowned customers in North America, EMEA and Asia rely on NeoLoad to improve the performance and quality of their web applications.
